

RECYCLED HABITATS

This week, make a habitat out of recycled materials! You could choose your favourite animal and make their habitat, or choose a habitat and make all the animals that live there!

INSTRUCTIONS:

1. Gather old magazines, newspaper, cardboard, toilet roll holders.
2. Grab coloured pens, pencils or paints
3. Cut out (with an adult's help!) and stick different colours and textures together to make your habitat

IDEA:

How about making your habitat 3D by making it in a cereal box on its side?

YOU WILL NEED:

- Recycled materials
- coloured pens pencils or paints
- scissors - with an adult's help!
- glue

NEXT UP:

Design your own camouflage! How would you camouflage yourself in your habitat? You could either be you or be an animal that lives in the environment you've created. Make yourself some camouflage for your habitat and send us a photo to info@youngvetsclub.com
